Custom Stat Service

Roster Submission Form

Submission Guidelines

Team Name:

_____

Max Length is 20 Characters including spaces

Following these guidelines will ensure that the process of data entry goes quickly and smoothly.

1. **Get the offensive position sequence** from your Commissioner and write the positions in the space provided. All rosters must have the same sequence. Failure to submit uniform sequences will result in players being out of position. Players that begin the season on your bench should have "RSV" in the postion column and should all be at the bottom of the appropriate Hitter or Pitcher player list. DO NOT COMBINE RESERVE HITTERS & RESERVE PITCHERS IN A SINGLE LIST

2. **Write player names in the following format**: LAST NAME COMMA FIRST INITIAL. Examples: Trout,M Mccutchen,A Kershaw,C This format is the actual Data Key that assigns stats to your players.

3. **If you are using salary/contract information** - Write the information to the right of the player on the end of the line. Do not separate the information (e.g., by putting the salary to the left of the player and the contract to the right of the player).

4. **If you use a swing player** (Tenth Pitcher or extra Utility Player), leave a blank line or write OPTION where that player would go. For example, if you decide to start the extra player at UT instead of at the 10th Pitcher spot, the tenth line on the pitching side should be either blank or have OPTION written in.

5. **Neatness Counts!** Make extra copies of this form to use as worksheets and submit only the final, very neatly written copy.
